

It's a Backyard Composter Sale!

Compost Yard Waste and More

Tired of seeing your vegetable scraps and more heading into the garbage? Compost it in with an Earth Machine™ backyard composter; over 800 sold in the F-M area during past events.

Homeowners can use the Earth Machine™ to compost leaves and grass from their yards, as well as fruit and vegetable scraps, crushed egg shells, tea bags, coffee grounds and filters, to create rich humus for lawns and gardens. This soil amendment can be used in place of chemical fertilizers, topsoil and mulch.

No more hauling your yard waste to the drop-off sites! Simply compost it in your own backyard and use it around your flowerbeds and garden. It turns kitchen and yard waste into a rich soil in as little as 6 to 8 weeks!

Dimensions and Details

The Earth Machine™ is a very user-friendly device that controls moisture, heat and ventilation, can be secured to the ground and includes a locking lid. It stands approximately 3 feet high and two to three feet wide; 80 gallon capacity. Easy, snap-together assembly; transports easily in most cars.

Clay County and the City of Fargo team up for the sale of these composters to area residents. To arrange purchase please call the City of Fargo Solid Waste Office at 241-1449. These Earth Machines™ can be purchased for \$36.75 including tax.
