

System Rain Barrels Are Available to residents at a cost of \$54.00.

Rain water, free from chlorine and water treatment chemicals, is an excellent water source for lawns, plants and gardens. Rain barrel use lowers municipal water demands and saves energy used in water treatment facilities by reducing water pollution and storm water runoff.

The System Rain Barrel's 55 gallon capacity, unique shape and neutral color allow it to blend into any gardenscape. It is made from high density polyethylene, up to 50% recycled content. The System's incorporated mosquito mesh keeps out bug and leaf debris. It is easily attached to existing downspouts. Overflow capability and accessories included.

Please call Shannon at 218 299-7329 for more information.
